

## SOFTWARE RELEASE NOTES

Version 3.4.1R (12/11/2017)

### Bugs resolved

1. The software is fast and responsive and the map redraw reacts quickly even in case of a large number of marks on the map.
2. Minor bugs related to the infos and icons on the map.

### Improvements:

1. Performances of the unit in case of a large number of tracks on the map have been improved.
2. Translations updated.
3. New settings applied to enhance your experience with the 4D cartography.

### New Features:

1. New COG and SOG Damping ( filter for COG oscillation ) has been added on Navigation Menu.
2. For the New Wi-Fi version only:
  - 2.1. Implemented the possibility to update software via Wi-Fi
  - 2.2. Added the possibility to connect and synchronize your data with Capitan Cloud ([www.capitancloud.com](http://www.capitancloud.com)).
