

Explorer 23 SOFTWARE RELEASE NOTES

Version 4.1.0R (11/09/2018)

Bugs Resolved

1. Fish Finder: colour of the background could change automatically if gain is changed manually
2. Fish Finder: Depth value could "blink" on display
3. After receiving Depth data, value "NAN" was shown in depth databox for several seconds
4. Captain Cloud icon is now displayed when WiFi is connected

IMPROVEMENTS

1. Added features for Chirp FishFinder (dual frequency, speed and temperature calibration)
2. Improved management of the SOG speed value even at low speed
