

Marine Software RELEASE NOTES

(9"/12" and Controller series)

Version 5.2.0R (18/07/2019)

*****See important compatibility notice below for old BBFF Black Box not-Chirp Fish Finder*****

Added:

- *RADAR: Full integration of Onwa radar antennas via wifi. Feature summary and sales policy following soon.*

Improved:

- *Sliding bar and digital keyboard behavior have been improved.*
- *GPS simulation now starts from current cursor position.*
- *All simulation functions remain ON even after a reboot.*
- *"Move to Vessel" option for MARK positioning has been giving higher position on menu listing.*
- *Save mark at fix position behavior has been improved.*
- *NM distance units improved for higher resolution (now to 1000s of NM, and so ~1.9m).*
- *Fixed FF image stability problems in dual frequency mode.*

Various other minor improvements and bug fixes.

- *n/a*

***** Compatibility Notice:**

- **WARNING: Marine Software Family 5.x (including all versions starting from release 5.0.0R), is NOT compatible with any legacy NON-Chirp FishFinders (FFs). Therefore:**
 - **DO NOT UPDATE YOUR SW IF...** you must use any NON-Chirp FF with your navigation system. Such NON-Chirp FFs are only compatible with Marine SW 4.2.0R (and earlier versions);
 - **YOU MUST UPDATE YOUR SW IF...** you will use a new Black box Fish Finder with Chirp technology (BBFF-Chirp). The new BBFF-Chirp is only compatible with Marine SW 5.0.0R (and later versions). Remember that any existing CW transducer that you have installed and used with a legacy NON-Chirp FF can also be used with a new BBFF-Chirp, although the BBFF-Chirp will function in CW mode unless it is connected to a Chirp transducer
